The new **Bril Downlight** is the perfect choice for anyone looking for elegant and efficient lighting.

With its modern and sophisticated design, it adapts perfectly to any environment, whether residential or commercial.

This downlight offers IP54 protection, which makes it resistant to dust and splashing water, meaning it can be installed in damp places, such as bathrooms and kitchens, without compromising its durability.

With a color temperature of 4000K, Downlight Bril provides clear, natural lighting, ideal for carrying out activities and creating a pleasant atmosphere. It also has a high energy efficiency rating, with 110lm/w, guaranteeing reduced energy consumption.

With a power of 42W, the Bril downlight offers powerful and uniform lighting, ensuring a well-lit environment.

If you are looking for a quality downlight with an elegant design, IP54 protection, ideal color temperature and high energy efficiency, the new Bril Downlight is the right choice for you.
